

PT LEA MEKANIKA INTEGRA

Your Single Source General
Contractor for your
Integrated Projects

**GENERAL CONTRACTOR
MECHANICAL, ELECTRICAL &
CIVIL CONSTRUCTION**

*"Delivering safe, reliable, and
quality-driven solutions through
every project we undertake."*

ABOUT COMPANY

PT LEA MEKANIKA INTEGRRA

PT LEA Mekanika Integra is an engineering and construction company focusing on mechanical, electrical, and civil construction for industrial and manufacturing projects.

Our services cover piping installation, electrical systems, electrical and control panel installation, civil construction, maintenance repair services as well as improvement works within industrial environments.

We primarily serve manufacturing sector, where we support various engineering and construction requirements. We are open to supporting projects across a wide range of industries

We prioritize safety, quality and timely delivery in every project we undertake. Supported by a team of professionals and a network of experienced partners, we deliver dependable and practical engineering solutions across various project requirements.

PT LEA Mekanika Integra strives to build long-term partnerships by providing practical and value-driven solutions tailored to client needs.

OUR **VISION**

To be a trusted partner in engineering and construction, recognized for delivering reliable and high-quality mechanical, electrical, and civil construction solutions across industries.

OUR **MISSION**

- To uphold strict Health, Safety, and Environment (HSE) standards in all operations.
- To deliver high-quality workmanship in every project.
- To ensure reliable and timely execution of services.
- To provide practical and efficient engineering solutions.
- To build trust through professionalism and consistent performance.

OUR CORE **VALUES**

Safety – Integrity – Customer Focus
Result Oriented – Kaizen - Collaboration

WHY CHOOSE US?

- **Industry Practitioners, Not Just Contractors**

Our team consists of experienced professionals from chemical and manufacturing industries who understand plant operations, maintenance challenges, safety requirements, and project execution from the owner's perspective.

- **Proven Engineering Experience**

Our personnel have collectively participated in numerous industrial projects, shutdowns, equipment installations, and plant improvement initiatives throughout their careers.

- **Multi-Discipline Expertise**

We combine mechanical, electrical, instrumentation, and maintenance expertise under one team to deliver practical and integrated engineering solutions.

- **Safety and Reliability Focused**

Every project is executed with a strong commitment to safety, operational reliability, and long-term maintainability.

PROJECTS

OUR SERVICES

ELECTRICAL & ELECTRONIC

- **Electrical Installation:** Comprehensive cabling for power systems, industrial lighting, and grounding systems including installation of cable trays, ladder and conduit
- **Electronic Repair:** repairing electronic equipment, including electronic cards, PCB, laboratory instruments, and inverter systems.
- **Custom Electrical Panels:** Designing and assembling LVMDP (Low Voltage Main Distribution Panels), motor control centers, and specialized automation panels

CIVIL CONSTRUCTION

- **Building Maintenance:** Scheduled upkeep of factory buildings, including structural inspections and roofing repairs, to ensure a safe working environment.
- **Floor Repair & Restoration:** Professional repair of damaged industrial floors, including crack injection, leveling, and heavy-duty resurfacing to maintain operational safety.
- **Office Renovation:** Comprehensive interior and structural upgrades for administrative spaces within industrial facilities to enhance functionality and professional aesthetics

MECHANICAL

- **Industrial Piping Installation:** Expert installation of piping systems for compressed air, fluids, and chemicals using Carbon Steel, Stainless Steel, or HDPE.
- **Machine Installation & Support:** Professional equipment positioning, leveling, and anchoring for new production lines or facility relocations.
- **Steel Structure Fabrication:** Custom machine platforms, industrial stairs, and safety guardrails.

ENGINEERING DESIGN

- **FEED (Front-End Engineering Design):** Providing initial technical designs and drawing, material specifications, to mitigate project risks.
- **P&ID (Piping & Instrumentation Diagram):** Developing detailed diagrams that illustrate the interconnection of process equipment and the instrumentation used to control the process.
- **As-Built Drawings:** Delivering finalized technical documentation to support long-term facility maintenance and future audits
